

Portfolio-Ankur Tiwari

Full-Stack Developer

About Ankur,

I am a web Developer based out of Indore (Central India) and I have acquired an experience of 7+ years now and have served multiple clients to their satisfaction in Australia, Asia, Europe and the US. I've supported them with best in class solutions for the requirements and problems that they have had which have ranged from Ed-tech, Social Networking platforms to Service and Content-oriented platforms.

I am a full stack, angular, flutter, react, laravel developer with ample experience and I have worked extensively on projects based on the same. I am currently associated with Gyrix Technolabs which is a web and mobile app development firm out of Indore.

I take pride in my ability of shaping clients' dreams into reality by developing premier products which are tailor fit to their needs. I have successfully developed long-term relationships with almost all of my clients and all of them would say nothing but good things about me. The reason behind the creation of these relationships is that not only do I like going the extra mile for my clients, I love doing so and it shows in the work that I do. I can provide great client satisfaction by providing right plans along with hard work, persistence, technical expertise, right communication and the functional knowledge to realise said plans.

I am very positive about my capabilities and can assure you that working with me will be an excellent experience since I have set very high standards for the service delivery and quality which will culminate into an everlasting relationship.

I would love to have the opportunity to work with you and at the same time, you will find a partner in me who is well poised in working on your requirements to your satisfaction. I sincerely hope that we can work as a team and that I may provide the world-class service that I pride myself on, catering to your current needs and hope that this project will result in a business relationship that will continue for a long time.

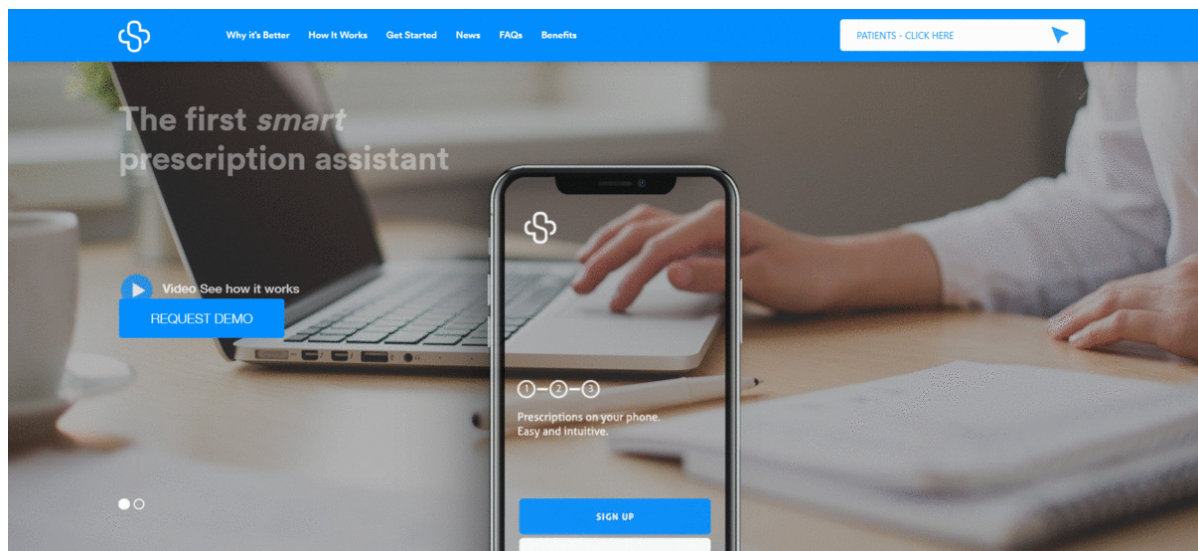

My previous works:

In the 7+ years that I have worked as a Full stack developer, I have had opportunities to serve many clients that have come from a wide assortment of industries, with a platitude of requirements and from countries on 4 continents, all of whom have generally been kind enough to bless me with glowing reviews.

However, you shouldn't take me on my word alone and for that reason, here's the previous works that I have undertaken with their screenshots and links. Feel free to visit any of the sites to get an exact idea of what I have achieved till now and what I am capable of.

Scalamed- Node, React

Scalamed is a med tech site that caters to doctors, patients, pharmacies and hospitals and it happens to be the world's first web tech web site that uses Block chain.

Basecamp Scout- Android

Scout is a GPS-enabled sales tracking app that keeps the sales managers connected with their sales team out in the field in real-time. A web and Android-based application, Scout acts as a location tracker app tailored to fit to the needs of sales professionals, who can check, track and get notified of their team's activities, anywhere and anytime. With its built-in capabilities, Scout empowers you to digitize your field force's working, right from marking attendance to geo-location tracking, task management, role management, data security, reports etc.

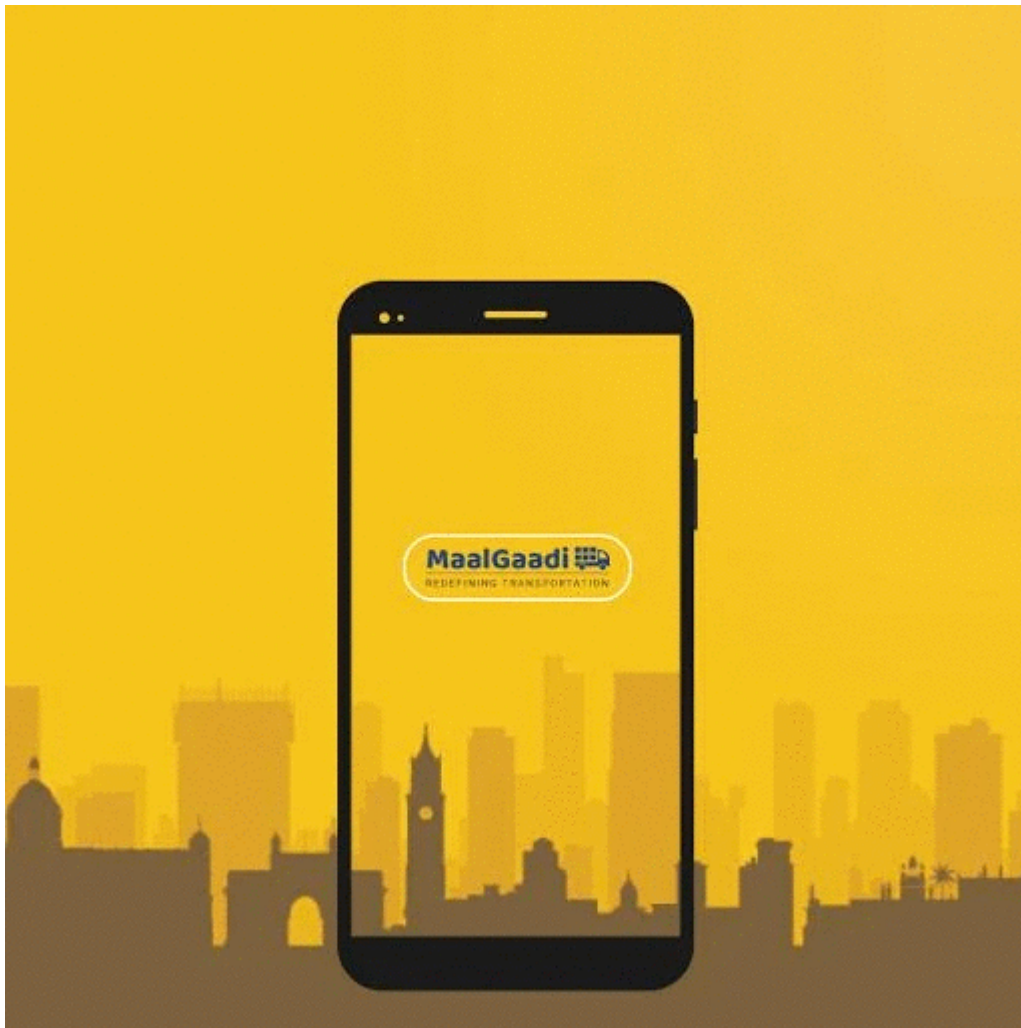

Manage routes with meetings

Easily create a route based on your meetings and know your estimated distance and time on-the-go!

Maalgaadi: Android Native

Use Maalgaadi to get the most economical loading vehicles in minutes. Say good bye to bargaining with drivers now, With press of a button on your mobile phone your desired loading vehicle will be at your door step. Enjoy hassle free

transportation today.

Below I am providing the links of other works that I have undertaken:

1. <https://play.google.com/store/apps/details?id=com.tikindia> - Flutter
2. <https://apps.apple.com/in/app/basecamp-scout/id1447103689> - IOS
3. <https://apps.apple.com/in/app/fleetpro-manager/id1455814074> -IOS
4. <https://futureskill.com/> - Node + Angular + React
5. <https://clickbetter.com/> - PHP

Skills that I am most proficient in:

My skillset for React Native Development:

Frontend:

- Languages - JavaScript, TypeScript, PHP
- Navigation - React Navigation
- Utilities - Lodash, Ramda, Moment.js
- Middleware - Redux Thunk, Redux-Saga, Redux Observable
- Networking - Axios, Contentful, Apollo, GraphQL
- Testing - Jest, Enzyme, Chai, Mocha
- App State - Redux
- Forms - Redux Forms
- Bundle - Webpack

Backend:

- Hosting - AWS, Rackspace, Heroku
- Configuration - Chef, Terraform, Docker, Kubernetes
- Pub/Sub Messaging - gRPC, RabbitMQ
- Databases - PostgreSQL, Redis, MongoDB, Elasticsearch, Mysql
- Server - Nginx
- App frameworks Rails, Trailblazer, Hanami, RSpec
- App Server Puma

Framework:

- Laravel, Code Igniter, Express & AdonisJS
